### **DETAILED ACTION**

Claims 1-5 and 9-13 are presented for examination.

#### ***Allowable Subject Matter***

Claims 1-5 and 9-13 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claimed invention is directed to a groping operation apparatus. Independent claims 1-3 and 9 identify a uniquely distinct feature "wherein said specifying means detects said contact point that is moved along a peripheral portion of said display screen to an end portion of said touch panel after being moved on said touch panel from an area other than the peripheral portion of said touch panel to the peripheral portion of said touch panel, with the end portions located at four corner areas of said touch panel, on the basis of said positional information, and specifies the action commanded by the operator from a movement start position in said peripheral portion and a movement termination position of said detected contact point, so that the operator can specify the action without seeing the screen by using the movement between the two end portions".

The closest art, Toru et al. as discussed in the previous office action, either singularly or in combination, fails to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
